Candidate A

Data Engineer | 8 years experience

SUMMARY

Built Spark batch and streaming pipelines on Azure Databricks for commercial analytics. Comfortable owning pipelines from design to production support.

SKILLS

Python | SQL | Spark | Azure | Airflow | Delta Lake

EXPERIENCE

Lead Data Engineer - Example Analytics Ltd (2021-present)

- Designed idempotent batch pipelines processing 2 TB daily on Spark.
- Led a team of four engineers; introduced code review and data-quality checks.
- Cut pipeline run time by 40 percent through partition tuning and caching.

Data Engineer - Sample Insights Inc (2018-2021)

- Built SQL transformation layers and scheduled jobs in Airflow.
- Migrated legacy ETL scripts to Python with automated tests.

Junior Developer - Demo Software Co (2016-2018)

- Maintained reporting scripts and supported production data loads.

EDUCATION

B.Sc. Computer Science, Example University, 2016

CERTIFICATIONS

- Example Cloud Data Engineer Associate (sample)

Synthetic sample resume for software testing. All details are fictional.
